🎙️ **Guion y transcripción del vídeo (3 Minutos)**

**0:00 – 0:25 | Introducción (Tarjeta de inicio en pantalla)**

- **[On Screen]:** *Mostrar la diapositiva/carátula con tus datos personales y del proyecto*[1]*.*
- **[Voiceover]:**

> *"Hello! My name is* **[Tu Nombre]** *, from* **[Tu Ciudad, País]** *. This is my final project for CS50P:* **Pythonic Library Catalog and Reader Management System** *. Today is* **[Fecha]** *, my GitHub username is* **[Tu GitHub]** *, and my edX username is* **[Tu edX]** *.*

> *My project is an object-oriented Python application designed to manage a library catalog, reader profiles, and reading histories with strict data integrity."*

---

**0:25 – 0:55 | Arquitectura y Código ( project.py )**

- **[On Screen]:** *Muestra VS Code enfocado en el código de project.py .*
- **[Voiceover]:**

> *"The project is built around the Library class, along with dataclasses for Book and Reader . To handle errors gracefully, I created custom exceptions like DuplicateIDError and DuplicateTitleError .*

> *I also implemented top-level functions such as create_reader , add_book , and delete_book to provide a clean global interface that interacts directly with the Library object."*

---

**0:55 – 2:05 | Demostración en vivo ( python project.py )**

- **[On Screen]:** *Abre la terminal y ejecuta python project.py . Ve seleccionando las opciones del menú conforme hablas.*
- **[Voiceover]:**

> *"Let me show you the program in action. Running python project.py presents an interactive menu.*

> *(Teclea '1' e ingresa 'Ana') First, I'll create a reader named Ana. The system assigns ID 1 automatically.*

> *(Teclea '4' e ingresa 'The Library') Next, I'll add a book titled 'The Library'. It gets ID 1.*

> *(Teclea '4' e intenta ingresar 'the library') If I try adding 'the library' again, even with different casing, the system catches a DuplicateTitleError and prevents duplication.*

*> (Teclea '7', Reader ID '1', Book ID '1') Now, I'll register book ID 1 as read by reader ID 1.*

*> (Teclea '8', Reader ID '1') Listing Ana's books confirms 'The Library' is in her reading history.*

*> (Teclea '6', Book ID '1') Finally, if I delete book ID 1, the system purges it from the catalog AND automatically clears it from Ana's reading history to maintain data integrity."*

---

**2:05 – 2:40 | Pruebas Automatizadas ( test_project.py )**

- **[On Screen]:** *Ejecuta pytest en la terminal de VS Code.*
- **[Voiceover]:**

*> "To ensure code reliability, I wrote automated unit tests in test_project.py using pytest .*

*> Running pytest executes tests for test_create_reader , test_add_book , test_delete_book , and test_update_book . All tests pass cleanly, verifying ID assignments, exception handling, and cascading removals."*

---

**2:40 – 2:55 | Cierre**

- **[On Screen]:** *Vuelve a la pantalla principal o al archivo README.md .*
- **[Voiceover]:**

*> "Thank you for watching, and thank you to the CS50 team for an amazing course. This was CS50P!"*
